

WATER-BASED PRIMER PRODUCT SUITE - LINE CARD

| CrystalCoat™ PR-504 | Water-based primer design to impart adhesion to polycarbonate, improves impact resistance, REACH compliant. | Flow | Water & Low VOC | Polycarbonate (PC) | | 1.50 refractive index for flow coat application to enhance adhesion to PC |
|------------------------|---|-----------------|-----------------|--------------------|---|---|
| CrystalCoa PR-765 | Water-based primer designed to impart adhesion to polycarbonate, improves impact resistance, REACH compliant. | Dip, Spin, Flow | Water & Low VOC | Polycarbonate | 5 minutes infrared heater or 30 minutes at ambient temperature. | Promotes adhesion of coatings to polycarbonate, NMP-free |
| CrystalCoat PR-1135 | Imparts adhesion to PC, primer improves impact resistances of coated PC and thin cast resin lenses. Pretreatment for PC and cast resin substrates recommended, REACH compliant. | Dip, Spin | Water & Low VOC | Polycarbonate | Room temperature at 30 minutes. Infrared or convection heater at <5 minutes | Impact resistance, compatible with SDC tintable coatings. |
