

**COTEC**<sup>®</sup>

## ***World's First Digital Hydrophobic Coating System For Automotive Display Panels***

[COTEC GmbH](#) and [CADIS Engineering GmbH](#) have collaborated in developing the world's first digital printer for hydrophobic-coated automotive displays, a significant advancement in the automotive industry. COTEC's expertise in ultra hydrophobic and oleophobic coatings enhance the durability and surface quality of automotive displays. This partnership with CADIS, a specialist in digital printing machines, has led to the creation of an industrial printer specifically designed for efficiently applying hydrophobic coatings on automotive displays.

### **Features:**

- Ultra-hydrophobic repels liquid
- Increased surface smoothness, water repellent
- Exceptional optical clarity
- Easy-clean anti-fingerprint/anti-smudge, oleophobic properties

### **Benefits:**

- Ability to coat large complex shapes with optimal efficiency
- Environmentally friendly
- Superhydrophobic surfaces offers adhesion yet removable without leaving residue
- Ability to mask off coating prevents material waste
- Controlled application with highest application efficiency
- Precise application with complex geometries speeds up production process
- Clearer and safer driving experience, hydrophobic coating improves visibility, reducing smudges on the display

### **Aligned with global health, quality, and environmental standards:**

- ISO 9001:2015 certified for quality
- ISO 14001:2015 environmental management standards
- Member of the European Society of Thin Films ([EFDS](#))
